Forecast Car Parking Demand

Note: Funeral records at Brookwood (Sept '22 - Aug '23) show that there were 98 funerals over the year (ave. 1.9 per week). The below graphs show a theoretical scenario of two funerals per day on the three surveyed days to illustrate that the burial parking could be accommodated regardless of the time and day that funerals occurs. In reality, an average of 2 funerals would typically in one week. Furthermore, data from Brookwood shows that 78% of the funerals have less than 40 attendees and only 2 had more than 100 attendees (103 and 107). A 'at capacity' funeral would therefore be very rare and has thus been included as a Sensitivity Test. Both graphs show that no funeral would exceed the proposed car park capacity.
